Gentlemen:

In accordance with Section 56. of FMVSS 115 this is to advise of our WMI and VIN coding.

We are a semi-trailer manufacturing facility producing less than 500 units annually and the S.A.E. has assigned us WMI No. 11J.

--- VIN CODING DETAIL ---

SECTION ONE...

Positions one thru three will be occupied by our WMI number 11J.

SECTION TWO...

Positions four and five will be the body type. At the present time only one body type will be used. The characters FS will be used to designate a flat bed trailer of the platform type.

Positions six and seven will be the overall length of the trailer. We will be using 40 thru 48 to designate forty thru forty eight feet in length.

Position eight will be used to designate the total number of axles. That is, 2 will indicate two axles, 3 will indicate three axles etc.

Position nine will be used for the check digit.

SECTION THREE...

Position ten will be used to designate our mfg. plant at Bath, Pa. This character will be a "B".

Position eleven will be used for the model year.

Positions twelve, thirteen, and fourteen will be ~~000~~ 000
~~the production sequence number (001,002,003,etc.).~~

Positions fifteen, sixteen, and seventeen will contain the production sequence number (001,002,003,etc.).

We believe the foregoing information is in compliance with the applicable Federal Codes, and is what is necessary to be submitted at this time.

Please contact me if clarification of any item is needed.

Sincerely,
The McCullough Mfg. Co. of Pa.

John P. Berard, Pres.

JPB/jc
