ATTN: VIN Coordinator, NSA-01, Rm. 5321  
400 Seventh Street, S.W.  
Washington, D.C. 20590

Dear Sirs:

We are a new manufacturer of small trailers, ranging in size from 4'x8' to 8'x8'. These trailers are not over 1499 pounds in empty weight. We use 2"x2" tubular steel for the main frame and 3" channel for the tongue. The axles vary in rating on weight as it all depends on what the customer asks us to build for them. Our trailers that are made from scratch come complete with safety chains and small cleavys to hold the chains on to the hitches as they tend to tighten instead of jumping out of place like the hooks that are on most trailers for safety fasteners.

Our local D.O.T. Officier has told us we need to register with your Agency and also apply for a World Manufacturer Identifier V.I.N. number as we only make trailers for those contracting such so we have no idea as to how many we will be putting out during a years time. Please send the information to the folloing address:
