RE: Updated VIN Decoding Information

In accordance with 565.7 of 49CFR Part 565, Vehicle Identification Number, we hereby submit the following update.

VIN positions 1, 2, & 3

45J is the manufacturer ID number assigned by SAE

VIN positions 4 & 5

Positions 4 & 5 are used together to identify the type and model of boat trailer. No two trailer models will have the same alpha numeric combination. The combination identifies a single, tandem, triaxle or pontoon model of either a TRAILMASTER or VANGUARD type boat trailer.

VIN position 6

Position 6 is used to identify the tire size. The letters A-Z represent the various sizes and types of tires on the trailer.

VIN position 7

Position 7 is used to identify the length of the trailer. The letters A-Z and the numbers 1-0 represent the trailer length to the nearest foot.

VIN position 8

Position 8 is used to identify the axle configurations. The numbers 1-3 identify the number of axles.

VIN position 9

Position 9 is the check digit. The check digit is calculated per CFR 565.4.

VIN position 10

Position 10 is the model year of the trailer.

VIN position 11

Position 11 is the number 1 indicating our only plant location of Mishawaka, IN 46544.

VIN position 12

Position 12 is used to identify alternate tire and rim information. The number zero indicates no alternate information.

VIN positions 13, 14, 15, 16, & 17

Positions 13-17 are the sequential production numbers beginning with 00001 and ending with 99999.

In accordance with 49 CFR 566, the following is the manufacturer identification.

J.Q. Tex, Inc
d.b.a. TRAILMASTER/VANGUARD
1033 E. 5th St.
Mishawaka, IN 46544
Phone 574-259-0329
